MOL verifies vessels in the Clean Shipping Index

14 February 2014 Per Nilson, Global Supply manager of Tetra Laval Group: “We are really happy to see that MOL have verified vessels according to the current requirement from the Clean Shipping Network. This means that MOL will strengthen their position since having verified vessels in CSN is one of the qualification criteria in our ocean freight procurement process”.

Volkswagen Group is first German automaker in Clean Shipping Network

6 February 2014 Gothenburg, February 5, 2014 – The Volkswagen Group is the first German automaker to join the Clean Shipping Network, an association of cargo owners. In future, Volkswagen Group Logistics will use the Clean Shipping Index (CSI) assessment tool to analyze and reduce the environmental impact of marine shipment. This step is part of the Volkswagen Group’s strategy with the objective of anchoring environmental sustainability in more and more business activities along the process chain.
